

Day guest agreement form

We require all prospective day guests to complete this form and agree to the conditions of our services. Our services are not available if you fail to fulfill our conditions.

1. Are you against telling us who referred us to you?
2. Are you against telling us the reasons you are contacting us?
3. Are you against completing the personal data on the prepared form at our center?
4. All the information you receive during the lifestyle consultation is neither diagnosis nor treatment. The information is only for educational purposes and personal encouragement. Are you against this?
5. We need 50ml of your first urine in the morning and put it into a container obtained from the pharmacy. We will also ask for a sample of your saliva once you arrive at our center. Are you against this?
6. We are running urine and saliva tests to help us know the habitual violation of the health laws in your lifestyle. The violation of the health laws causes energy loss in your body. Are you against us running the urine and saliva tests? Dr. Carey Reams invented the test.

Some information about Dr. Carey Reams:

Carey A. Reams (1903-1985) was ahead of his time. Trained in mathematics, biophysics, and biochemistry, he made many discoveries in human health, plant growth, energetics, animal health, and soil restoration. These findings were later codified in an overall view of life and energy known as Reams Biological Theory of Ionization (RBTI). Reams summarized his beliefs by saying: "God is the basis of life, life is the basis of energy, energy is the basis of matter." Reams worked as a consultant, researcher, and lecturer for more than five decades. A significant milestone in Reams' life occurred in 1931. Due to a "friend in need," Reams spent three days fasting and praying, trying to figure out how to help this friend. During this period of prayer and fasting, Reams received the inspiration of the numbers for humans in ideal health. Reams strongly believed that if you know what the optimal is, you know how to get there. You can change not-ideal chemistry to ideal because you know the optimal standard. Foundational for Reams' life and success as a scientist was his faith in God. As a disciple of Jesus, he sought to live his life according to the biblical standard. Everything he taught about the health of the people of the world had its foundation in the Bible. Dr. Reams only taught the Biblical Health Message, cleanse the Temple, eat only the appropriate foods, have a good attitude, remineralize your body, exercise, and could be healthy.

The RBTI test is the measure of excessive loss of ENERGY.

A loss of ENERGY results from a mineral deficiency, and the loss of minerals results from violating the health laws. As various organs contain more or less of the elements, it is possible by analyzing the urine and saliva to determine which organs are losing too much energy. The excessive loss of energy of any organ will cause the analytical readings of the specimens to arrange the numbers into a range pattern, denoting the exact area where the loss of energy occurs. The excessive elementary energy, or the lack of it, is manifest in the laboratory readings while it pinpoints the extent of the energy. The loss of energy from one organ affects other organs. All of our organs are more or less dependent upon one another. Pain is often the result of a loss of energy.

Dr. Reams taught that God is the author of mathematics and chemistry. He made the laws of life, solids, liquids, gases, minerals, and vegetables. Chemistry could not exist without mathematics. There would be no need for mathematics were it not for chemistry. The joining together of chemistry and mathematics is called PHYSICS. God is a God of PHYSICS. All things made by the laws of physics adhere to the laws. IONIZATION is God's laws putting things together and taking them apart ion by ion. An ion in its singular anionic form is the smallest amount of ENERGY in existence, in fact, the smallest thing that God ever created. All things are formed from IONS.

Dr. Reams learned all of this information when he was a student of Albert Einstein. As a young scientist in the 1930s, Reams thought a lot about Einstein's special mass-energy equation; however,

Day guest agreement form

he was pioneering on his own without a teacher. The more he contemplated its possible meanings and applications, the more he began to question how the equation might demonstrate that biological life's mass (M) may be built out of energy (E). Ream's first encounter with the famous $E=MC^2$ equation; led him to raise the question, what was happening to the energy as it moved from A to B and the energy moving from B to A.

In a personal and fortuitous encounter with Dr. Einstein at Princeton University, Reams asked Einstein about his thoughts on how his equation might apply to moving energy from B to A. "Dr. Einstein," Reams asked, "Since you have shown science how energy moves from A to B, would you explain what it means to move energy back from B to A?" Einstein's response was brief. "I'm going to give you that assignment," he stated. Reams took Einstein's challenge and realized that Einstein's equation provided the first relativistic definition of what matter is. "Matter", is made up of two types of energy: E1 (heat) and E2 (electrical); therefore, $E1 = MC^2 - E2$. In other words, Einstein's formula says that E2 (electrical) energy equals the difference between MC^2 (matter) – E1 (heat) energy. That is, electricity is the energy that holds things together. Electricity is what makes chelation. Electricity is the substance between heat and matter, while matter is heat plus electrical energy. Up until this time, Reams realized that electricity had never been defined or understood. Now Einstein's equation demonstrated that electrical energy is the substance between heat and matter. Few realize that Einstein's Theory of Relativity and his famous equation $E = MC^2$ helped solidify the mathematical thoughts of Carey Reams on how life is put together or taken apart by energy in ionic form. Einstein revealed how to take the atomic structure apart and release the energy within it, whereas Reams revealed how to take the energy within an atomic structure and build healthy, high-energy biological life out of it.

Dr. Reams was baptized into the Seventh-day Adventist faith in 1952. He remained in this faith till his death in 1985.

Before his death, Dr. Carey Reams had made this statement.

"Many trained in the use of drugs give man the glory for healing. The RBTI gives God the glory for the restoration of health."

7. Are you against the above information about Dr. Carey Reams, the founder of the urine and saliva testing method?
8. Are you against donating at the suggested amount of sixty-five euros per person for the urinalysis and lifestyle consultation? The donation of sixty-five euros is non-refundable.
9. We are not doctors who administer treatment; we are lifestyle counselors providing lifestyle education. Are you against this?
10. Lifestyle education results are atypical? It does not produce the same effect on all persons. Therefore, we are not promising that it will have the same result for everyone. Are you against this?
11. Suppose your health condition is life-endangering, and you are coming to us for lifestyle education services. Are you against promising not to hold us responsible if your condition is not better or worsens?
12. We are not promising you verbally or written that your health will improve or be restored with our lifestyle education? Are you against this?
13. Your decision coming to us is your own. Are you against taking personal responsibility for the result of your decision coming to us?
14. If you are currently taking prescribed medication, there is a possibility of an unpleasant reaction in your body because of the lifestyle changes; this is a normal and expected reaction because of the detoxification processes in your body? Are you against this?
15. If you are currently taking prescribed medication, you will consult your physician before altering the dosages of your medication. However, should you personally choose to change

Day guest agreement form

the dosages prescribed by your physician and adverse reactions occur, are you against promising us that you will not hold us responsible for this?

16. Our lifestyle education is not under insurance coverage; therefore, you need to cover the costs through your donations. Are you against this?
17. We reserve the right to terminate our services if you do not fully cooperate with our education program. Are you against this?

- If you are **against one or more of the above conditions**, Write, "I am against. I wish not to proceed." in the provided space below.
- If you are not against any of the above conditions, write, "I am not against. I wish to proceed." in the provided space below.

Please write your decision below:
